

Bartender reduces repair work as overlap grows

—●— Bartender - - ■ - - In-place repair

Repair starts

Observed repair work

Overlap probability p (log scale)

Overlap probability p (log scale)

High-p labels: in-place mean / Bartender mean. Both axes logarithmic; panel scales differ.

Means and 95% normal intervals over 30 seeds; sync interval 1; window 256; relocation 0.

Work is abstract model effort, including observed partial repairs; it is not elapsed time.
