

Delay changes what reaches Main before a repair

Time runs downward. Dots: landed edits. x: conflict. Events and spacing are schematic.

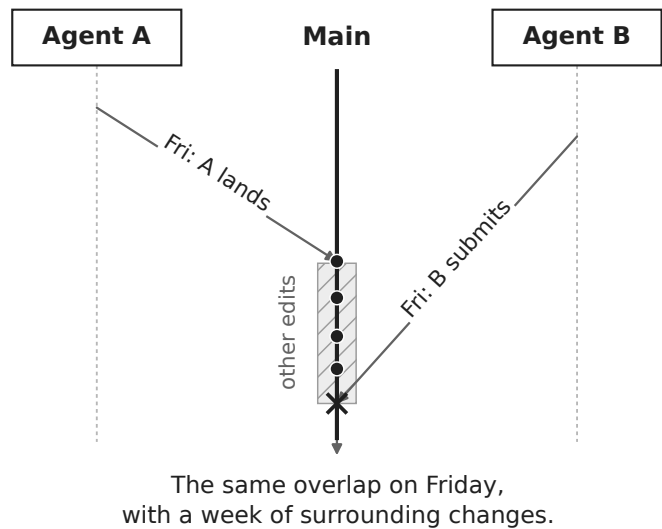

(a) Synchronization interval, τ

auth.rs: A edits lines 10–20 on Monday; B will edit lines 15–25.

Daily synchronization

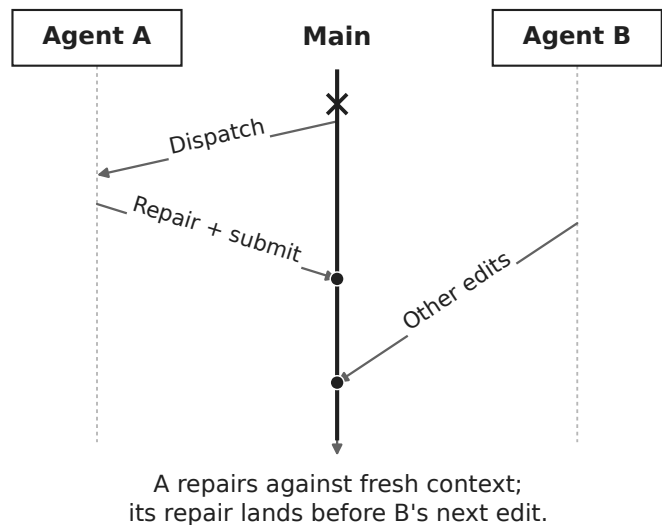

Weekly synchronization

(b) Waiting after dispatch, δ

10:00: detect the conflict and dispatch to A. A repairs from that snapshot.

Immediate repair

Repair two days later
