

Clean work first changes the repair ledger

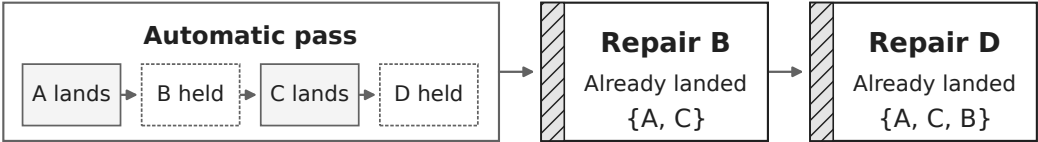

Scan order: A → B → C → D. Initially, A and C are clean; B and D conflict with the base.

In-place repair
3 repairs

B's repair makes C conflict

Bartender
2 repairs

 Land without repair  Repair  Repair caused by an earlier repair

Already landed: original worktree identities at repair start; every repaired item then lands.

Event order only. Spacing does not encode elapsed time or repair effort.
